MR. KENG'S REMARKS.

Mr. King began by explaining the work done by

During the Exposition thousands of manufacturers

through our state in order to reach Chicago. It is of the utmost importance that these visitors should become Throughly familiae with the advantages that this state presents for the establishment of manufacturing industries, so that if, after travelling through our country, they should deem it wise to locate here, they may give to the advantages offered by New-York such consideration as they deserve. It is a well-known fact that, in the past, various cities and towns in our state have not only offered considerable sums of money to seeme the location of manufactories within their boundaries, but they have given the land for the buildings, etc., and exempted the establishments from taxes for a number of years. This proves flow highly the securing of such industries is regarded, and, wherever they have prospered, like entire community—the farmers in the vicinity among the rest—have reaped the benefits. brough our state in order to reach Chicago. It is of

When the natural advantages and the unrivalled re When the natural advantages and the unrivalled resources of this state are taken into consideration it with be seen that a number of bureaus will be required in order to supply full information to the thousands of foreigners who will visit our country during the year 1800. You will readily perceive the benefits that will accuse to the State from this source, provided that the increas of information maintained are complete in every detail and placed in charge of thoroughly competent men. It has been estimated by good Judges that the amount of money necessary for salaries for employes in all departments will be not less than \$125,000 or \$150,000.

THE WHOLE NATION INTERESTED. In bringing it is phase of the subject to the attention of your committee, we are not animated by solutions or by any spirit of galning an advantage for

come. "You must be glad that the committee is relieved of a great responsibility," he said to Chairman Blomet, who had just given him the intelligence. "I think we have done well," Mr. Chipman added. "The committee has shown the right spirit throughout; we have been harmorlous and have considered it as a National question on which all should be united. I am glad such a satisfactory termination has been brought about."

Other members of the House who were seen showed the feeling of relief they felt at the outcome of the trouble. In the senate also the members of the Foreign Relatious Committee has placed the pudlock of absolute secreey on all its proceedings, and without that being removed, they did not feel at liberty to talk, lest they should disclose what had taken place in

to come. New York State, as having within its borders the chief po t of enery for the country, has a most important part to take. We cannot afford to do things by halves, or to create the impression that we are indifferent to the possibilities of this occasion.

THE NAVAL PARADE.

The next point to which I wish to call attention is the naval parade which is to take place in New-York Harbor as a part of the World's Fair exercises. This has been entrusted by the Government of the United States to the World's Fair Commissioners representing the State of New-York. Provision must, of course, be made to cover the cost of this parade. This is an impassed, and for this reason there had been not permitted duty of our State. The estimated expense of a much talk among Senators on the subject.

servative estimate, and has been made after chemical amination of the subject by men well qualified to express an opinion.

In the World's Fair act passed by Congress no provides has been made for the entertainment of fereign visitors who will enter this port in connection with the naval parade. In the minds of our committee there is grave doubt as to whether Congress has any authority to make an appropriation to defray the expenses of what will be an affair of New York State.

It will be necessary for the State of New-York to provide such entertainment for our distinguished guesta as bells the dignity and position of the State. I ask you to remember that New-York is the port of entry for the whole United States. The importance of making suitable provision for every feature of the great naval parade is, therefore, made doubly_cytdent.

Furthermore, it must not be forgotien that the women of the State are to have a direct part in this great exhibition, and that there are women commissioners to look after their interests. A certain amount or the appropriation made by the Legislature must be used to pay the necessary expenses of these Commissioners. How much will be required for this purpose must be determined by the Commission constituted to represent our State; but I presume, gentlemen, you all know by experience that it behooves us to treat the ladies handsomely.

a small State Commission and urged the appointment of one Commissioner from each Judicial District, instead of three, as provided by the bill. On this point he
